

SALSA Field Report: 9 Dec 2018. Compiled by Matt Siegfried.

SALSA Geophysics/SALSA EM, Location: Whillans Subglacial Lake

- Moving day! Today we broke down camp, hopped on our snow machines, and headed towards the green pastures of Whillans Subglacial Lake. It took a few miles, but we located the old WISSARD Traverse route from the GZ borehole to SLW, with flags sticking up between a few inches and a few feet ever 100 yards. Not bad for a four year old flagged route.
- Not much to report other than there's just as much powder as I remember.

A camp on skis.
